

# Danger

## Tanning Equipment Can Cause Cancer

Ultraviolet (UV) radiation exposure can be hazardous to your health:

- Overexposure causes skin and eye burns
- UV effects are cumulative
- Drugs and cosmetics may increase UV effects
- Greater risks are associated with early and repeated exposure

In the long term, UV exposure can contribute to premature ageing and skin cancer

- Follow instructions
- Use protective eyewear
- Not recommended for use by those under 18 years of age
