

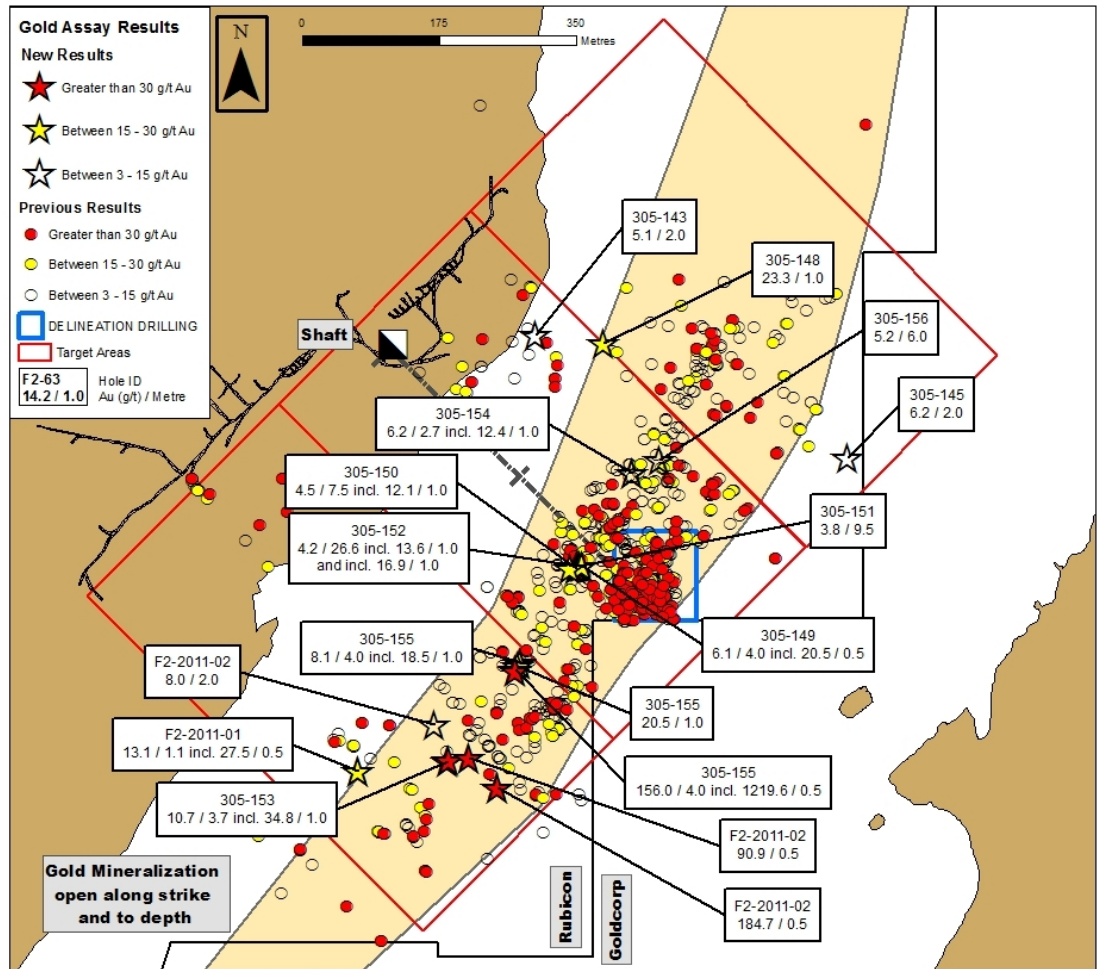

Figure 1: F2 Gold System Plan Map

Holes with the prefix '305' were drilled from underground. Holes with the prefix 'F2' were drilled from surface. Assays are uncut unless otherwise stated. Reported lengths are core lengths, more drilling is required to determine true widths. Reported results are highlights from the ongoing drilling program on the F2 Gold System. A complete listing of results to date for the F2 Zone is available at www.rubiconminerals.com.
